

Mohamad Moallem | Data Scientist | Software Developer

Lebanon | P: +961 71 150 442 | mohamadmoallem79@gmail.com | [Linkedin](#) | [Online Portfolio](#)

OBJECTIVE

Enthusiastic and detail-oriented Computer Science graduate with a major in Data Science, passionate about computer vision, machine learning, and data-driven problem solving. Eager to contribute to innovative projects in tech-driven environments where I can apply my technical skills and creative mindset to real-world challenges.

EXPERIENCE

Software Developer Intern | [Salem Group](#)

Aug 2025-Nov 2025, Remote

- Improved the Mehnati platform by adding features, fixing UI issues, and enhancing overall user experience.
- Investigated and helped mitigate a Japanese SEO malware infection by identifying entry points and supporting cleanup.
- Improved SEO through structured data, metadata optimization, and indexing enhancements.
- Debugged React components and API requests, resolving functional issues across the platform.
- Performed performance checks and implemented optimizations to improve page load speed.
- Documented technical issues and delivered clear reports to the development team.

WordPress Developer & Content Optimization Intern | [Upgrade Your Game](#)

Jan 2026-May 2026, Remote

- Optimized and redesigned WordPress pages to improve SEO, readability, and user experience.
- Built and customized new pages using existing WordPress templates.
- Applied on-page SEO (titles, meta descriptions, headings, internal links, image alt text).
- Monitored performance using Google Search Console and GA4 to track search visibility.
- Improved average Google search position to ~1.4 through ongoing SEO optimization.
- Supported SiteGround hosting tasks including backups and basic maintenance.

PROJECTS

Online Portfolio Website

Dec 2025

- Developed a responsive portfolio website using React, Vite, and Tailwind CSS, featuring project showcase, skills timeline, and dark/light theme toggle. Deployed to GitHub Pages with automated CI/CD pipeline for continuous updates.

SafeWalk AI – Final Year Project

June 2025-Aug 2025

- Developed an AI-powered mobile app for visually impaired navigation by integrating YOLOv8n (indoor mAP@0.5 $\approx$ **0.64**, outdoor $\approx$ **0.51**), MobileNetV3 (**>80%** scene classification accuracy), MiDaS (depth estimation), and EasyOCR (text extraction), with outputs processed via a lightweight rule-based instruction generator; trained and optimized models across diverse datasets and formats (**including custom annotations**) to achieve robust real-time performance.

DIY Website

June 2024

- Built DIY Website using HTML/CSS/JavaScript/Restful API using Python and Flask with database integration using MySQL. The website helps people find relevant crafts providing there videos, general instructions, and materials needed.

Gesture Rock-Paper-Scissors

June 2024

- Created a Rock-Paper-Scissors game that recognizes hand gestures using Python with libraries like **cvzone** and **cv2** (**OpenCV**) combining computer vision with interactive game development using real-time image processing.

EDUCATION

University of Sciences and Arts in Lebanon

Beirut, Ghobeiry

Bachelors in Computer Science

Aug 2025

Major in Data Science

Relevant Coursework: ML, Deep Learning, NLP, Software Engineering, Databases, Web Development

ADDITIONAL

Technical Skills:

Operating Systems: Windows, Linux(ubuntu)

Databases: MySQL, PostgreSQL

Programming: Java, Python, Sql, JavaScript,

Machine Learning: Scikit_learn

Data Analytics: Pandas, Numpy, Seaborn, Matplotlib, Tableau

Deep Learning: Pytorch, TensorFlow

Languages: Fluent in Arabic; Conversational Proficiency in English(C1)
