Mohamad Moallem | Software Developer | Data Scientist

Lebanon | P: +961 71 150 442 | mohamadmoallem79@gmail.com | Linkedin | Online Portfolio

OBJECTIVE

Enthusiastic and detail-oriented Computer Science graduate with a major in Data Science, passionate about computer vision, machine learning, and data-driven problem solving. Eager to contribute to innovative projects in tech-driven environments where I can apply my technical skills and creative mindset to real-world challenges.

EXPERIENCE

Software Developer – Mobile & Cross-Platform Integration | SATCON Africa

Jul 2026-Present, Hybrid, Saida & Choukine

- **Wallet platform:** Independently developed a Flutter mobile application, Kotlin backend, and React monitoring dashboard using a shared backend; project approximately 70–80% complete before being paused for licenses.
- Configured Docker containerization for the Kotlin backend and integrated Firebase/Firestore notification functionality; collaborated with a senior developer responsible for most production-server deployment work.
- **Company management mobile app:** Contributed to a Flutter counterpart of an existing browser system covering tasks,tickets, channels, shipping containers, and chat.
- Owned substantial cross-platform integration work between separate mobile and PHP-based browser backends; co-developed APIs with a senior developer to synchronize application functionality and data.
- implemented notification synchronization for actions originating on either web or mobile; assisted with macOS/iOS development tooling and Apple Developer account setup.

WordPress Developer & Content Optimization Intern | Upgrade Your Game

Jan 2026-May 2026, Remote

- Optimized and redesigned WordPress pages to improve SEO, readability, and user experience.
- Built and customized new pages using existing WordPress templates.
- Applied on-page SEO (titles, meta descriptions, headings, internal links, image alt text).
- Monitored performance using Google Search Console and GA4 to track search visibility.
- Improved average Google search position to ~1.4 through ongoing SEO optimization.
- Supported SiteGround hosting tasks including backups and basic maintenance.

Software Developer Intern | Salem Group

Aug 2025-Nov 2025, Remote

- Improved the Mehnati platform by adding features, fixing UI issues, and enhancing overall user experience.
- Investigated and helped mitigate a Japanese SEO malware infection by identifying entry points and supporting cleanup.
- Improved SEO through structured data, metadata optimization, and indexing enhancements.
- Debugged React components and API requests, resolving functional issues across the platform.
- Performed performance checks and implemented optimizations to improve page load speed.
- Documented technical issues and delivered clear reports to the development team.

PROJECTS

SafeWalk AI – Final Year Project

June 2025-Aug 2025

- Developed an AI-powered mobile app for visually impaired navigation by integrating YOLOv8n (indoor mAP@0.5 ≈ **0.64**, outdoor ≈ **0.51**), MobileNetV3 **(>80%** scene classification accuracy), MiDaS (depth estimation), and EasyOCR (text extraction), with outputs processed via a lightweight rule-based instruction generator; trained and optimized models across diverse datasets and formats (**including custom annotations**) to achieve robust real-time performance.

EDUCATION

University of Sciences and Arts in Lebanon — Beirut, Ghobeiry

Bachelors in Computer Science — Aug 2025

Major in Data Science

Relevant Coursework: ML, Deep Learning, NLP, Software Engineering, Databases, Web Development

TECHNICAL SKILLS

Operating Systems: Windows, Linux(ubuntu)

Programming: Java, Python, Sql, JavaScript,

Data Analytics: Pandas, Numpy, Seaborn, Matplotlib, Tableau

Databases: MySQL, PostgreSql

Machine Learning: Scikit_learn

Deep Learning: Pytorch, TensorFlow

Languages: Fluent in Arabic; Conversational Proficiency in English(C1)
